Fischer Panda Expands Comprehensive Range of Watermakers

TheYachtMarket.com Southampton Boat Show, 15th to 24th September, Stand E020

Fischer Panda's Aqua Matic XL watermaker

Fischer Panda UK can now meet the water-making requirements of a range of vessels from small power and sail boats up to mega yachts with the addition of the high-capacity Aqua Matic XL to its comprehensive range of Sea Recovery watermakers.

The Aqua Matic XL features fully-automatic, one-touch operation and optional remote control and is developed for vessels requiring large quantities of water quickly and easily, making it suitable for super and megayachts, as well as workboats, support vessels, sport fish, charter and diving / cruising boats.

Much smaller and more compact than similar watermakers with comparably large production capabilities, the Aqua Matic XL offers significant water supply of 2200 to 3600 gallons per day (8328 to 12870 litres per day) without the need for extra maintenance or more space.

The XL version is offered as a higher production alternative to Fischer Panda's popular range of fully-automated Sea Recovery Aqua Matic systems, which are more suited for boats of 50ft-100ft. These premium Aqua Matic models are ideal for users requiring a watermaker that operates independently and needs minimal maintenance.

Fischer Panda also caters for customers with mid-range boats looking for a well-priced system which is simple to maintain and operate, but still requires a certain amount of involvement from the user. Its middle capacity Sea Recovery Aqua Whisper models and its popular semi-automatic HRO (Horizon Reverse Osmosis) range of compact Seafari models are ideal for sailing yachts and motorboats and factory-fitted on Sunseeker and Fairline boats.

PRESS RELEASE

The Village Marine range is the third brand in Fischer Panda's watermakers portfolio. These rugged systems are developed for 24/7 consumption and high levels of user operations, ideal for a variety of commercial, offshore, workboat and fishing vessels and tugs.

Chris Fower, of Fischer Panda, said: "The priorities we hear from customers looking for a watermaker are easy and simple maintenance, reliability and competitive price, which are key features of our HRO range. Our Sea Recovery range is often selected by our super and megayacht customers who prefer completely automated functionality, but we find the semi-automatic option is the most popular among the majority of boat owners. The other key factor for our customers is that we offer global support across our three brands."

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide and this year is celebrating its 40th anniversary.
